

Chrysalis®/Catalyst®- Pearlescence Cross Reference Table

With Lamin-Art's expansion of our Pearlescence® Solid Colors collection, our metallic-looking Chrysalis® and Catalyst® finishes are now available for specification on all 50 Pearlescence colors. As a result, we will soon be retiring the pattern names and numbers associated with the independent Chrysalis and Catalyst collections. All products in these collections may now be specified by their Pearlescence color name and the associated finish code (**A** for Chrysalis and **B** for Catalyst). The cross reference chart below is provided to help you specify your favorite existing Chrysalis or Catalyst product using its new pattern number, name, and finish code.

Chrysalis/Catalyst		Now Known as...		
Pattern #	Pattern Name	Pattern #	Pattern Name	Finish
4001	Brushed Silver	5060-A	Metalene Quicksilver	Chrysalis
4002	Vintage Silver	2102-A	Royal Pewter	Chrysalis
4003	Silverglint	2407-A	Taupe	Chrysalis
4004	Nickel	2418-A	Graphite	Chrysalis
4005	Brushed Pewter	5062-A	Metalene Astro	Chrysalis
